Subject: Sept 12 workshop

We respectfully urge the Public Service Commission to hold its Sept 12th public hearing on net metering (PSC Docket #2005-385-E). While the EAC work is important, we think it's necessary to continue the public discussion on how existing rules can be improved to allow for limited amounts of solar competition - sooner rather than later. We have talked with many individuals who have applauded the PSC for committing to a public dialogue on solar energy and we look forward to getting started. Thank you for your consideration.
